MORBIDITY REPORT

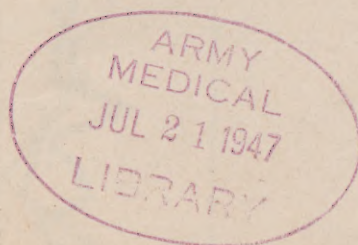

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 21 September 1946

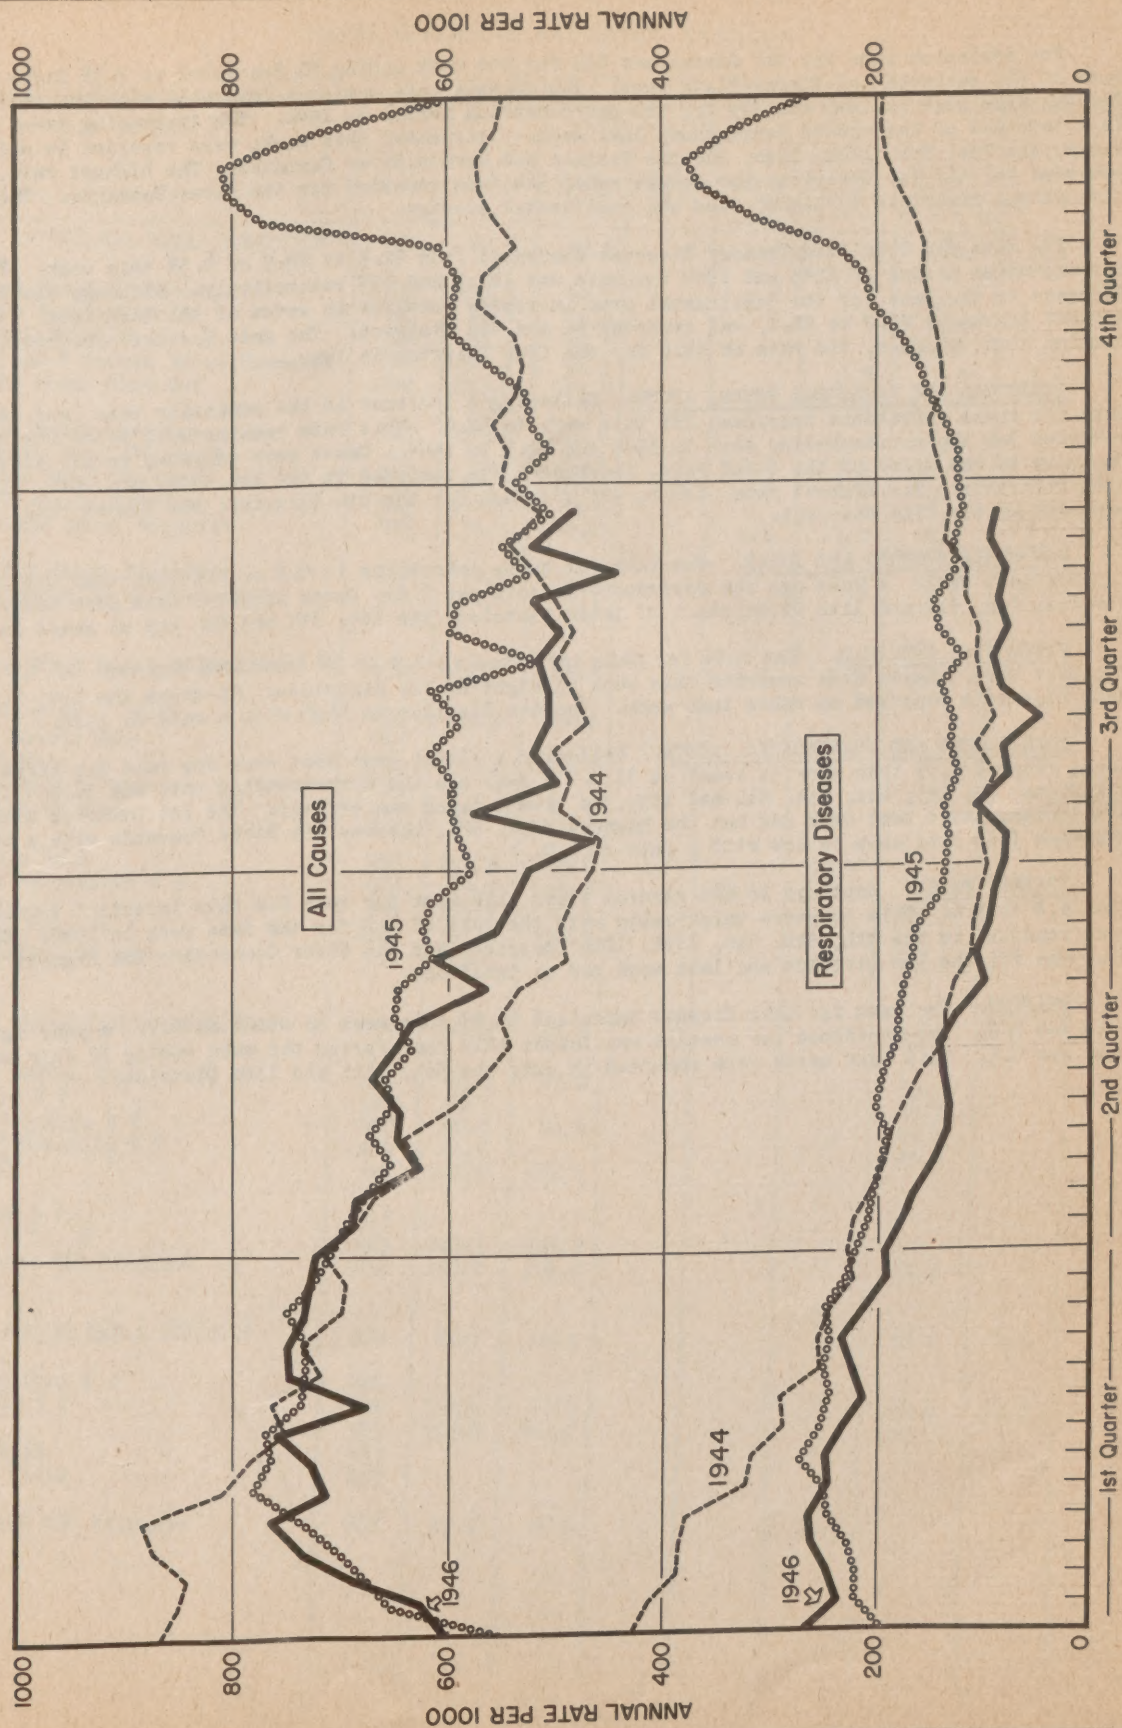

REPORT NO. 247

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

Week Ending 21 September 1946

The admission rate for All Causes was 482 for the week ending 21 September or 7.5% lower than the rate of 521 reported for the previous week. The current rate compares favorably with the rate of 503 for the same week in 1945 and 513 for the corresponding period in 1944. The decreasing trend this week is a reversal of the upward spurt shown last week. Decreases, this week, were recorded in all districts except the 7th, 8th, 12th, 13th, and the Potomac and Severn River Commands. The highest rate, 632, was recorded for the 1st District; the lowest rate, 364, was recorded for the River Commands. The rate for five of the districts is higher than the continental average.

The rate for Total Respiratory Diseases decreased from 92.5 to 88.5 or 4.3% this week. For the corresponding period in 1945 and 1944 the rate was 121.1 and 133 respectively. Although there was a decrease in the rate for the continental area increases occurred in seven of the districts. The largest increase, 20.2 to 81.1, was reported in the 4th District. The rate for the 5th District, 117.5, remains high; whereas, the rate of 34.6 for the 13th District is low.

INFLUENZA AND CATARRHAL FEVER, ACUTE. Following a increase in the admission rate last week, the rate for these infections decreased 28% this week to 52.6. This rate remains well below the rate 80.0 recorded for the corresponding week in 1945 and 92.1 in 1944. Cases were reported in all districts. Contrary to the trend of the total rate, increases were recorded in the 1st, 4th, 6th, 8th, 11th and 12th Districts. The highest rate, 116.6, was recorded for the 6th District; the lowest rate, 3.1, was reported by the 13th District.

PNEUMONIA-BRONCHO AND LOBAR. The rate for these infections is 0.8 or 20% less than the rate of 1.0 for last week. A year ago the corresponding rate was 2.2. Cases reported this week occurred in the 1st, 7th, 8th and 11th Districts. Of these districts the 1st, 7th and 8th had no cases last week.

PNEUMONIA, ATYPICAL. The rate for this infection is 3.8 or 5% less than the rate of 4.0 reported for last week. Cases were reported this week in eight of the districts. Of these the 1st, 7th and 12th Districts reported no cases last week. The 6th District is high with a rate of 15.8.

TONSILLITIS AND PHARYNGITIS, ACUTE. Following a slight rise last week the rate for these infections dropped 6.0% this week to stand at 31.4. A year ago the corresponding rate was 36.7. In five districts, the 1st, 4th, 6th, 8th and 12th, an upward trend was evident. The 1st District with a 37% increase over last week now has the highest rate, 521, whereas the River Commands with a 66% decrease from last week is low with a rate of 9.0.

SCARLET FEVER. Contrary to the general trend this week the rate for this infection increased from 1.8 to 2.6. This compares unfavorably with the rate of 1.4 for the same week in 1945. Cases were reported in the 4th, 5th, 9th, 11th, 12th Districts and the River Commands. The highest rate, 10.4 was for the 9th District who last week had no incidence.

MEASLES. The rate for this disease decreased 66.6% this week to stand at 0.7. A year ago the rate was 0.6. The incidence for measles was lowest this year during the week ending 22 July when the rate was 0.5. This week cases were reported in only the 5th, 11th and 13th Districts.
